

# WORX® ALL-NATURAL HAND CLEANER

## Product Information

WORX® All-Natural Hand Cleaner is the most cost-effective and powerful industrial hand cleaner available in the market. Plus it is SAFER for the consumer and the environment than the competition!

WORX® All-Natural Hand Cleaner is a skin and body cleanser. It removes stubborn stains, dirt, grease, and grime from the dirtiest hands and bodies. Its unique formulation acts instantaneously to remove any odor causing particles from stains and deposits.

Simply follow WORX's four steps to washing (for hands or whole body wash):

1) Wet hands or whole body

2) Apply WORX powder

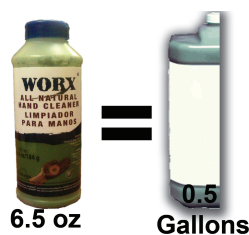

3) Scrub vigorously

4) Rinse thoroughly

FOR USE AS  
BODY WASH

The All-Natural Hand Cleaner concentrated powder comes in a variety of easy-to-use containers. Take a look at the efficiency of the All-Natural Hand Cleaner compared to other solvent based hand cleaners.

The All-Natural Hand Cleaner does not have solvents, phosphates, harsh chemicals, alkali, or other toxic substances. The natural scrubbers in this product do not contain sand, pumice, or any tree nuts, peanuts, or legume shells - eliminating the risk of possible anaphylactic reactions in those with nut allergies. The All-Natural Hand Cleaner will not harm the skin, or be absorbed through the skin; it leaves the skin's natural oils intact. The All-Natural Hand Cleaner will not freeze, it will not separate under hot weather conditions, it has years of shelf-life, it does not require any special transportation considerations, and it is classified as non-OSHA and non-WHMIS. It is the first hand cleaner to be certified in Canada by the Canadian Environmental Agency Terra Choice (EcoLogo) and by Green Seal in the USA.

The All-Natural Hand Cleaner conditions the skin while biodegradable cleaning agents are at work. The All-Natural Hand Cleaner reduces or completely eliminates rashes and skin irritations associated with solvent based cleaners. Since The All-Natural Hand Cleaner does not contain harmful or abrasive ingredients that damage the skin, the need for additional conditioning products is eliminated.
